

System UI Illustration & User Guide

A visual, step-by-step navigation handbook for new system users, staff, managers, and administrators.

Welcome to Queenstech ERP! This guide provides an illustrated tour of all **17 system pages** across Operations, Finance, Workplace & Procurement, and Administration. Learn key features, UI layouts, interactive controls, role permissions, multi-branch switching, and custom receipt headers.

Global Interface Layout & Navigation Architecture

Queenstech ERP features a unified desktop layout divided into 3 primary zones: the **Collapsible Sidebar Navigation**, the **Global Header Bar** (with multi-branch selector and quick search), and the **Dynamic Content Area**.

QUEENSTECH ERP

1. Operations Modules

Dashboard (/app/dashboard)

Executive Overview & Key Performance Metrics

The central command hub displaying real-time business vitals: total sales revenue, pending customer orders, low stock item alerts, bank balances, and monthly revenue vs expense charts. Quickly access quick-action shortcuts to add sales or register new inventory.

Inventory (/app/catalog)

Stock Catalog & Multi-Branch Items Management

Manage your product catalog across branches. Track stock levels (current stock, reorder points, reorder quantities), unit costs, selling prices, barcodes, and SKUs. Supports stock adjustments and automated reorder alerts.

Orders (/app/orders)

Sales Orders, Customer Requisitions
& Multi-Item Cart

Register and track Local Purchase Orders (LPOs) from customers. Features customer database dropdown synchronization, POS/E-commerce style multi-item cart with unit steppers (+ / -), auto-calculated line totals, grand totals, and order delivery status tracking.

Customers (/app/customers)

360-Degree Customer Directory &
CRM Histories

Comprehensive customer relationship management. Maintain contact profiles, tax IDs, credit limits, outstanding balances, lifetime value, and loyalty tiers (Bronze, Silver, Gold, Platinum). Log interactions (calls, meetings, notes).

Transactions (/app/movements)

POS Sales, Receipt Generation &
Stock Transaction Logs

Point of sale checkout and complete stock audit log. Record sales with multiple payment methods (Cash, Card, Mobile Money, Bank Transfer, Credit). Print or export shareable PDF/Image receipts with branch-specific customizable header details.

Branches (/app/locations)

Multi-Branch Store Locations &
Warehouse Setup

Manage physical stores, outlets, and warehouse locations. Define branch addresses, contact managers, and branch specific stock inventory segregation. Easily switch active branch contexts from the top header.

Featured UI Highlight: Orders Page Multi-Item Cart & Steppers

The newly enhanced Sales Orders modal features **Customer Database Sync** and an **Interactive Multi-Item Cart** allowing staff to quickly add inventory products or custom items, adjust units using [-] [+] stepper buttons, and automatically calculate line item totals and grand order amounts.

CUSTOMER SELECTION (SYNCHRONIZED FROM DATABASE)

■ Select Customer: Acme Holdings Ltd (CUS-00012) ■

■ Product: Steel Pipes 50mm | Price: 45,000 | [+ Add]

1. Steel Pipes 50mm

UGX 45,000 / unit

-

3

+

Total: UGX 135,000

[■■■]

GRAND TOTAL ORDER AMOUNT

UGX 455,000

2. Finance & Accounting Modules

Bank Accounts (/app/bank)

Bank Accounts, Cash Flow &
Reconciliation

Track bank balances, cash-in-hand, and cash flow movements. Record bank transfers, incoming customer payments, outgoing supplier deposits, and monthly statement reconciliations.

Debtors Ledger (/app/debtors)

Customer Outstanding Receivables & Debt Tracking

Monitor all unpaid customer balances and credit terms (Net 7, 15, 30, 60). Features automated aging breakdown (0-30 days, 31-60 days, 90+ days overdue) and record receipt payment entries.

Creditors Ledger (/app/creditors)

Supplier Payables & Liability Management

Track company payables owed to vendors and raw material suppliers. Record partial or full invoice settlements, view payment schedules, and prevent supplier account defaults.

Expenses (/app/expenses)

Operating Expenses & Reimbursement Workflows

Log operational expenditures (utilities, transport, rent, office supplies). Categorize expenses, attach digital receipt images/PDFs, and handle staff reimbursement approvals with audit trail tracking.

Featured UI Highlight: Transactions POS Receipt Sharing & Custom Headers

On the **Transactions** page, staff can issue sales receipts that can be exported or shared as **PDF or Image** files. Each branch manager can customize their receipt header details (Branch Title, Subheader, Tax ID, Phone, and Custom Receipt Footnote).

■■ BRANCH RECEIPT HEADER CUSTOMIZER

Header Title: Queenstech ERP - Main Branch

Subheader: Plot 45 Kampala Road, Uganda

Phone: +256 700 123456 | TIN: 1002938475

Footnote: Thank you for doing business with us!

■ SALES RECEIPT #REC-2026-089

Customer: Walk-in Customer | Payment: Cash

Amount Paid: UGX 150,000 (VAT Inclusive)

■ Download Receipt PDF

■■ Export Shareable PNG Image

3. Workplace & Procurement Modules

Employees (/app/employees)

Staff Directory & Page Access Permissions Matrix

Manage employee profiles, job titles, and system access accounts. Assign role presets (Admin, Manager, Cashier, Inventory, Accountant) or configure granular employee-specific page permissions.

Chatroom (/app/chat)

Internal Team Chat & Messaging

Real-time team collaboration chat. Features general company channels, direct messages between staff, file attachment sharing, and announcement broadcasting.

Assets (/app/assets)

Hardware, Equipment & Fixed Asset Registry

Track company machinery, vehicles, computers, and office equipment. Record asset status, initial cost, current value, meter readings, and scheduled maintenance service records.

Supplies (/app/suppliers)

Vendor Directory & Purchase Order
Procurement

Maintain vendor supplier profiles, supply catalogs, lead times, and purchase order requisitions. Send purchase requests to suppliers and record incoming inventory deliveries.

Reports (/app/reports)

Business Analytics & Report Exports

Generate analytical reports for inventory valuation, sales breakdown, expense summaries, and customer performance. Export clean PDF reports and Excel spreadsheets.

Featured UI Highlight: Employee Page Access Role Customization

Admins can control exactly which pages each employee can see. Assign role presets or toggle individual system module checkboxes in the **Employee Access Modal**. Navigation sidebars and bottom mobile bars automatically adjust based on allowed pages.

■ EMPLOYEE: Sarah N. (Sales Cashier) | Assigned Role: Custom Access

PAGE PERMISSIONS: 12 / 17 ALLOWED

4. Admin & System Setup Modules

Settings (/app/settings)

Company Setup, Multi-Branch &
System Configuration

Configure organization profile, default currency (UGX), tax rates (VAT 18%), invoice notes, receipt templates, multi-branch settings, and security policy rules.

Help (/app/help)

Interactive User Manuals, Guides &
FAQ Knowledgebase

Built-in documentation center featuring searchable user guides, video walkthroughs, system keyboard shortcuts, and interactive FAQs for staff onboarding.

Role Access Permissions Reference Matrix
